PROJECTS

CODE EDITOR

May 2022

- Uses Node.js and Express and designed for writing and managing code collaboratively.
- Follows the MVC (Model-View-Controller) pattern for clean separation of concerns and maintainable code.

INFO GUARD

Jan 2024

- Established InfoGuard as a benchmark for user privacy and legal compliance.
- Used factory patterns and comprehensive logging to enhance system scalability and traceability.
- Ensured consistent performance and regulatory conformity.

N3IMN

May 2024

- Uses Flutter for consistent user experience on Android and iOS, and Firebase Firestore for secure and scalable data management.
- Create/update profiles, showcase services, manage schedules, and interact with customers in real-time.
- Provides a smooth interface for managing barber profiles and customer appointments.
